Abstract
Cohesion is a relation of meaning that exist in the text. Cohesion is divided into two forms, they are lexical cohesion and grammatical cohesion.Grammatical cohesion is cohesion expressed through the structure or grammar. In this research the writer only analyzed forms of grammatical cohesion in the hot issues of Time magazine published on July 2007, March 2008, August 2009, June 2010, October 2011 and February 2012 along with the types of grammatical cohesion itself in the form of reference, substitution, ellipsis, and conjunction. The purpose of this research to find out the forms of grammatical cohesion and its types in the hot issues text in Time magazine. The method used to analyze the data is distributional method by Sudaryanto (1993). From the data collected, the writer found four elements of grammatical cohesion that are used in Time magazine. They are (1) reference, types of reference found; personal, demonstrative, and comparative. (2) Substitution, types of substitution found; nominal, verbal, and clausal. (3) Ellipsis, type of ellipsis found; nominal ellipsis. And (4) conjunction, types of conjunction found; additive, adversative, causal, and temporal. After analyzing the data, the writer conclude grammatical cohesion are indispensable to form a whole text, in this case the text of the news magazine.

Key words: grammatical cohesion, time magazine, types of grammatical cohesion
